WebP Express is an easy to use WEBP image converter that allows you to drag and drop PNG, JPEG or GIF images into the program to convert them into WEBP format. Key Features: • Drag & Drop (image) conversion to WEBP • Set image quality • Custom Image resize • Set image placement • Fast image conversion time • Save WEBP as JPEG, JPEGXR, GIF or PNG • Export WEBP image to JPEG, JPEGXR, GIF or PNG. • Export image as base64 string • Export images to zipped file • Quick image view in compressed WEBP format • Display image quality settings • Uses APIWebP 1.1 • Comes as portable program • Windows and Mac OSX supported

We are constantly working to improve our software, but you might experience some bugs. All users are invited to send feedback on our web page or write an email to tech@websolutions.net.

Q: facebook app review We just got our beta app released, but we got a misspelled word in the title and description. We're about to make changes to our app, but our review option says we have to wait for approval. Is it always this slow or are they doing some extra checks as well? We have the real version in alpha, but we will not update it until the beta version is approved. Also, we tried to make a change, but it fails on the simulator (crashes). It also gives the option of creating a new version, which we can't do if we can't make changes to the old one. A: Totally normal and expected. I've just been testing my app after a release, (

WebP Express was created by Robert Yu because, despite its name, it's actually a very good program that supports: PNG and JPEG images .GIF images TIFF images BMP images All image formats supported by the Google's Chrome, Safari, and Android browsers, as well as Microsoft Edge and Opera browsers. This program is the only application of its kind that supports all browsers in addition to converting files from one format to another. Features: - Simple conversion process. - Built-in multi-threading. - Supports drag and drop. - Comes with a built-in preview. - Uses the Pixlr universal image editor. - Supports all browser extensions. - Has a built-in feature for everything. - Works for all formats. - Supports conversion from one format to another. - No setup needed. - Conversion completed in real-time. - Interactivity from any location. - Complete output folder structure. - Works on the Mac and the Windows. - Comes with a built-in FAQ section.

WebP Express macOS Requirements: OSX 10.10 or later WebP Express Windows Requirements: Windows 7 or later

This program is the only application of its kind that supports all browsers in addition to converting files from one format to another. Features: - Simple conversion process. - Built-in multi-threading. - Supports drag and drop. - Comes with a built-in preview. - Uses the Pixlr universal image editor. - Supports all browser extensions. - Has a built-in feature for everything. - Works for all formats. - Supports conversion from one format to another. - No setup needed. - Conversion completed in real-time. - Interactivity from any location. - Complete output folder structure. - Works on the Mac and the Windows. - Comes with a built-in FAQ section.

WebP Express macOS Requirements: OSX 10.10 or later WebP Express Windows Requirements: Windows 7 09e8f5149f

By Lynxsoft Technologies, LLC. Publisher's Description THIS IS A STICKY PRODUCT, PLEASE READ BEFORE INSTALLING WebP Express is an easy-to-use application that allows you to convert your images to the WebP format in no time. It is not about having smaller files or compressing them to get rid of quality defects. WEBP is a new image format created specifically for the web, and it is optimized for small file sizes. This new format is very efficient in its compression and highly compatible with other popular internet formats. Website : The developer of WebP Express is Lynxsoft Technologies, LLC. They claim to provide "a very flexible, fully-featured tool for creating your own personal media server" in their official website. With a large collection of tools and cloud-based services, WebP Express can help you make good use of all your photos in whatever you are doing. It allows you to create a play list, based on the time that a photo was taken, or the GPS location of your photos. You can also upload your photos to a website, be it personal or commercial, via this user-friendly application. You can also add notes, create playlists, and create web galleries with the help of the application. It is very easy and intuitive to use as well. The premium version of this application allows you to convert your photos to the new WEBP format. Also, it allows you to create a web gallery that will be used for creating slideshows and other projects. The largest feature that it has, however, is the compilation of various tools to convert images to different formats. You can convert your photos to the JPG and TIFF formats, as well as to the PNG, GIF, and BMP formats. You can also convert your images to the WEBP format, and even to the PSD format. Your photos can also be utilized for social networks, such as Facebook or Pinterest. You will be able to create feeds for all your friends in a matter of seconds. Thus, WebP Express is a great tool that everyone can benefit from. What can be improved? WebP Express is a great application for those who are looking for a simple, friendly and intuitive way of converting their images to WEBP. This application is easy to use and can be used to convert PNG, GIF, JPEG, and B

What's New in the?

WebP Express is a simple and easy-to-use program that allows you to convert PNG, JPEG and GIF images to WEBP, a format created by Google that can save your website up to 50% of the file size without losing any of the quality. You can easily drag and drop your images or access the tool from your computer. This tool was written by Coudreur. Be sure to check out his other tools as well:

This is the Free PNG to WEBP Converter - developed by me, Neil. This tool is offered as open source so that you can use it for free. If you like the app, feel free to donate, or donate what you can. Payment goes to pay for hosting and to keep the server up and running, as well as to buy coffee so I can keep working on this. :) You can also become a Patron to gain access to the Patron-only features on the app. These include: save downloads and images directly to Google Drive so that you can access them from any device, ability to choose input and output location, and the addition of another license that will allow you to use the app without watermarking of your images. Licensing is currently a bit of a crazy mess in terms of the license names, and there are plans for new ones, but for now the images you use with this app can be watermarked in case you want to use the standard license as well as one that will allow you to use the app without watermarking. When I finally am done, that license will be the only one that will allow watermarking. If you want to learn more about the license, or if you want to donate, you can go to The Patron-only features are listed on the main page and in the help menu, but this does not appear to be working as designed. Be sure to check back later for the new features. Let's get the review out of the way. Advantages: + Simple Interface + Fast + Works Disadvantages: - Runs slowly - about a 1.4 Mb file in my testing. - Unfortunately, does not appear to allow multiple outputs - When testing, had some problems with launching the app, which I don't understand. More info: - The current version of the app can

System Requirements:

Supported OS: Windows 7, 8, 8.1, 10, and 10.1. 64-bit Windows only. OSX 10.9 or higher Minimum: Intel i5-4590 Processor or better Intel® HD Graphics 4600 or better AMD Radeon R9 295X2 or better NVIDIA GeForce GTX 970 or better 4GB RAM DirectX 11 video card driver Windows 7: HDD Space 7.
