Graphics Galore Adobe Photoshop uses a layer-based editing system that enables you to superimpose many layers (as many as 32) of different color, grayscale, or even patterned images on top of one another. A `_layer_` is an image-based grouping of different parts of the same graphic. A `_layer mask_` enables you to decide which parts of a layer should display over another layer. A `_raster`

Image: Alex from Tumblr (via) We will go through the various functions in this article, and also show you exactly what you can do and what you can't do with these editing options. We will start with the very basics, show you how to preview your image and then go on to show you what you can do with the filters, adjustments and other editing tools. What is Photoshop Elements? As you might be able to tell from the name, Photoshop Elements is an alternative to Photoshop. It is an editor for photographers, graphic designers, web designers, gaming creators, image editors and hobbyists. The program is well suited for image editing that requires some experience and it is also great for creating and editing simple graphics, fonts, web graphics and other graphics. The best way to understand Photoshop Elements is to understand what it is not. While Photoshop is a professional graphics design tool, it is overkill for many people who just want to get their images edited in Elements. Features of Adobe Photoshop Elements Photoshop Elements was designed to bring together all the features that Photoshop has and combine them into a streamlined, easily accessible package. It is designed to work on every Windows and Mac computer with no extra software or applications required. Below are some of the features that Photoshop Elements has that you might already know about. A limited selection of editing tools While Photoshop has many more editing tools and features than Elements, Elements still has a pretty good selection of the most commonly used tools that you would find on a traditional editing tool. Many of the tools that are available in Photoshop are also available on Elements. Adobe Photoshop Elements, however, has fewer features than Photoshop. It doesn't have selections, which means that you cannot drag and drop an object or an area to change the size or shape of it. The Import/Export feature is also missing, meaning that you cannot share images with other programs or use it to browse, import or export images. Other features that are missing include Clone Stitch, Paste, Built-In 3D, Crop and Retouch. Adobe Photoshop Elements, however, has the ability to show pixel previews, has Express Edge, Smart Sharpen, Better Edge, Free Transform and more. These tools are the basics of image editing. Better photo editing tools Photoshop Elements has a number of tools for editing photographs that are similar to those in Photoshop. Layers While 05a79cecff

Q: How to change size of output from mongo shell In mongo shell I can get output from the last 20, 50, 100 command. I'm trying to do something like: asadmin> mongo "mongo dba.system.mongoddb --help" asadmin> "mongo dba.system.mongoddb options" [Output: { "documentId": "801546b6e5621fca01f71d65b4712b12", "index": "system.oplog.rs", "opTime": "2016-03-01T06:21:23.834+0000", "opId": "3b29d63e8d226b060c4938f2e7184ff1", "replyToMaster": true, "masterSource": "primary", "source": "primary", "type": "c", "wireVersion": 2, "maxWireVersion": 2, "typeName": "MongoDB", "dbname": "dba", "collectionName": "system.oplog.rs", "namespace": "system.mongoddb", "resolvedOptions": { "tlsSettings": { "sslEnabled": false, "sslCertificatePath": null, "sslCertificatePassword": null, "sslRootCertificates": null, "sslPemCertificatePath": null, "sslPemCertificatePassword": null }, "fsync": { "fsyncEnabled": true, "fsyncInterval": null, "fsyncCheckpointInterval": null, "fsyncSplitInterval": null } }, "recoveryMode": "net" }] [asadmin] exit ERROR: : unexpected response: 503 As I can see, mongo shell can output to some log file using --logFile, but what I can see is only copy a number of output to my local machine. I can change size of output from 10 to 200, 500, 1000. I would like to get exactly 200 lines of output using mongo shell. A: You can use the --quiet parameter. You can use the -q parameter to use the former curl approach to get the last 500 records. > mongo --quiet "mongo dba.system.mongoddb --help" > db.

Introduction ===== The judgment of the physician is the first moment of a large process. Diagnosis is made based on his analysis, explanation and thought, evaluated by the patient's feeling and experience. The patient also brings his own experience and insight to the situation and the physician should always know this. Background ===== Gerontologists are faced with a wide range of medical-technical equipment in their practice. Anesthesiology and intensive care medicine are relatively new medical specialties and gerontological practice can be considered as a new type of medical practice. Objectives ===== The important aspect of medical care is the therapeutic success in relation to a reduction of the patient's risk, pain and suffering, improvement in the patient's quality of life and in the case of death the quality of death. The need of gerontologists to focus on all these aspects is even more pronounced because of the gerontological illness in the elderly population. When gerontological patients come to the gerontological practice, one may expect a higher prevalence of medical illnesses in this group and an increase in the complexity of their medical care. In the same way as in adult medicine, gerontologists have to deal with a higher number of patients than gerontologically trained specialists and need to show what kind of medical care is available to the elderly patient. The aim of this study was to show the range of medical equipment and the range of the quality of care in the daily practice of gerontologists. Methods ===== In this descriptive study medical, economic and emotional parameters were evaluated in the medical history of a group of elderly patients. The patients were consecutively referred by the geriatric outpatient clinic to a gerontological consultation. The gerontological consultations were performed in the special ward of the gerontological outpatient clinic, Amsterdam, The Netherlands. Results ===== In the group of 363 patients, 46% was male and 54% female. The average age was 77.8 years (range 57-101) and most patients were in the age group 80-89. In 70% of the cases the medical history contained a medical illness. In this group of 70%, the most frequent medical illness was

hypertension with 54%. Respiratory diseases were present in 37%, cardiovascular diseases in 36% and neurological diseases in 24%. 65% of the patients suffered from two or more medical illnesses. Most patients, 48%, were treated at home. A total of
